

BLAIRS.AG CATTLE CO.

The Pursuit of Excellence

2017 BULL SALE

Tuesday, April 4, 2017 1:00 PM Jackson Cattle Co. Sale Facility,
Sedley, Saskatchewan

WELCOME TO THE 2017

Pursuit of Excellence Sale

TUESDAY, APRIL 4, 2017 | 1:00 PM | JACKSON CATTLE CO. SALE FACILITY, SEDLEY, SASKATCHEWAN

The year 2016 presented some interesting challenges for the Ag industry in terms of both weather and markets but somehow we all came out the end of it in good shape. Feed costs have remained reasonable and the price of feeder calves, slaughter cows and bulls are at respectable levels. There is a rebuilding of cow inventories across North America and a genuine desire from most cattleman to ensure that phenotype is a key driver in their rebuilding decisions.

More now than ever we need to ensure that the cow herd is functional and sound. It is critical that the beef herd has the ability to endure through tough environmental conditions, breed back and maintain longevity. The industry continues to talk about genomics without a great understanding of what that truly means. We have great hopes for what genomics can do for the industry in the future but feel strongly that the current genomic models are failing the industry as a whole. Accuracy and reliability have not been attained and we have not yet begun to develop genomic models to measure traits that will truly impact the cow/calf producer.

The future is extremely bright for the beef industry as the world's affluent population has clearly made beef the number one choice to add to their dinner plate both at home and in restaurants. We must continue to understand beef quality, educate the public about how quality is achieved and promote beef as the number one choice. It's important to understand that we are all in the beef industry together and our competitor is not other segments of the beef industry. Focus our efforts on the person or segment of our population who eats chicken, fish, pork or god forbid, are vegans.

We are proud of this year's bull sale offering and continue to stay committed to searching the globe for breed leading genetics. This year's offering has a blend of genetics from Canada, the US and New Zealand and next year's offering will also have an exciting group of Argentine genetics. We focus on selling two year old bulls that have been through a more intensive screening and culling process and are confident you will be very impressed with the offering.

This year we are adding a new twist to the bull sale by adding 170 commercial bred heifers from our long time bull customer, Lazy T Ranch. The bred heifers are sired by Blair's bulls and are all bred to Blair's bulls. This is an opportunity that normally doesn't come around and is incredibly unique. Step up and buy with confidence. Heifers start calving May 1st.

Join us on April 4th in Sedley, SK or on DV Auction.

Kevin Blair

Blairs.Ag Cattle Company

FROM THE DESK AT T BAR...

Our suggestion is that everyone in the livestock industry should circle the date of April 4th on their calendar, day-timer or Ipad. "The Pursuit of Excellence" will be one of the highlight sales of the spring season.

For those who have not met Kevin and Darren Blair and the team from Blair's, you owe it to yourself to get to know them. They are dedicated to agriculture in all sectors. The company is North American and employs young people who have grown up and came through the agricultural sector. The Blairs.Ag commitment to juniors in the livestock sector is huge; they started out as juniors themselves and now enjoy seeing junior success throughout the agricultural industry. At Blairs.Ag, no breeder big or small gets ignored!

The line-up of bulls is powerful.... where can you find two year old Angus bulls... untouched, not picked over.... programmed for the sale... ideal for anyone who wants to breed cows or cover lots of acres. The offering of bulls has been selected from a huge cow herd built from powerful cow families and a very extensive transplant program, taking advantage of the breed's cutting edge genetics. For those who have been following the fall and early spring show season, Blair's is rapidly becoming a household name and the source for genetic excellence. Congratulations are in order for their success at Agribition, Denver and Fort Worth!

April 4th is an opportunity day to move your program forward....remember it is never too late to take advantage of the Blairs.Ag program... you owe it to yourself and your cow herd!

If we may be of assistance prior to or on sale day feel free to call any of the T Bar Team or myself. We are willing to assist you in a professional, confidential manner.

SALE DAY LOCATION

JACKSON CATTLE CO. SALE FACILITY

Box 159 Sedley, Sask S0G 4K0 Phone: 306.537.9251
From Sedley: Go 4 miles north on 620, then 1/2 mile west and 1/2 mile back north.

SIGHT UNSEEN PURCHASE

If you are unable to make the sale, we will help you with your selection and guarantee your satisfaction. Contact any us or any of our sales staff for more information.

SALE DAY VIDEO SALE

We have elected to go with a video display only sale again for 2017 and forgo running big, two-year-old bulls through the handling system and into the sale ring. We do this primarily for the safety of the bulls to reduce the risk of injury and bruising. As always, the bulls will be displayed and sorted for viewing in pens right outside of the sale center. We feel that with your pre-sale evaluation and the excellent videos broadcast on the screens, that you can make a selection with confidence just as previously.

DELIVERY

Bulls will be delivered free of charge anywhere in Saskatchewan, Alberta, British Columbia or Manitoba. Delivery will start the week after the sale. For US customers we will deliver bulls free of charge to central locations in the northern and central USA.

FINANCING OPTIONS

Cash or cheque are accepted sale day.

Platinum Warranty Program

Blairs.Ag Cattle Company guarantees to sell a bull that is sound and has passed a semen test by an accredited veterinarian. Should any bull purchased through the Pursuit of Excellence bull sale fail to be a satisfactory breeder or be unable to physically service a cow or heifer, he will be replaced with a bull of equal value. Should this not be possible, we will issue a credit to go towards the purchase of another bull. We will not however provide warranty for mismanagement.

While under our warranty, the bull is covered for injury, sickness or death. We will service your needs with a replacement bull, a sale credit or a cash settlement. Should you have any problems with a bull, please contact Blake MacMillan and he will work to make sure your cows get bred and you are a satisfied customer. We do have back up bulls set aside and that will be the first step to cover off any warranty issues. Blair's Platinum Bull Warranty is designed to protect your purchase during the most high risk time of a bull's life.

We offer the following options and are required to be paid on the day of the sale. It is the buyer's responsibility to purchase at the settlement desk.

PLAN	DURATION	RATE
#1	45 days	3%
#2	6 months	6%
#3	12 months	10%
#4	18 months	14%

COVERAGE:

Plan #1 – This plan is designed to warranty a bull from sale time until the bull can be delivered and has the opportunity to adjust to its new surroundings. The length of the Plan #1 warranty is 45 days. Plan #1 warranty covers 100% of the purchase price less the salvage value when applicable.

Plan #2– This plan covers the bull through breeding season and is 100% of the purchase price less the salvage value when applicable.

Plan #3 – This plan covers the bull for a full year which will include one(1) breeding season and one wintering period. In Plan #3 the warranty covers 100% of the purchase price less the salvage value when applicable.

Plan #4 – This plan covers the bull for eighteen(18) months and should cover two(2) breeding seasons and one(1) wintering period. In Plan #4 the warranty covers 75% of the purchase price less the salvage value when applicable.

EXCLUSION TO WARRANTY:

Any injury or death due to malicious, willful or intentional acts or mistreatment are considered fraudulent claims.

Should an issue arise with your bull please notify Blair's immediately by phone 306-528-7484 or by email bmacmillan@blairs.ag. You will also need to contact a licensed veterinarian to diagnose and treat the animal and fill out a vet form. If the animal dies, a post mortem will be required.

Note: All bulls that are left at Jackson Cattle after the sale for delivery will be automatically charged the 45 day Plan #1 bull warranty on their invoice. This is designed to protect both the buyer and seller.

Blair's Quantum 579C is a unique breeding piece. His sire is the Te Mania Quantum bull we found in New Zealand. We were impressed with his foot, performance and fleshing ability. The dam Yankee 12W is the most famous donor in our Red Angus program and is destined to be one of the most influential females in the history of the Red Angus breed. This outcross combination puts it all together and the future could be very interesting. A full sib sold in our last year's sale to Seth Cargo ND. Set your program apart and make a decision to lead the Red Angus breed forward.

Red Blair's Signature 586D was a division winner in Denver. His dam is the Yankee 12W donor and when we combined 12W with Red Six Mile Signature 295B we got the power and performance as expected. If you want to add some Signature genetics to your program while adding performance then take a serious look at 586D. Red Six Mile Signature 295B semen is off the market for 2017.

55C and 572C are full sibs to the \$55,000 Red Blair's Bingo 581B, \$37,000 Red Blair's Kongo 580D and many more including the Red Blair's Notorious 62B that sold in our 2016 bull sale to Moose Creek and Lazy T Ranch. We can talk all day long about this mating and about the great udders on the Kargo daughters. Kargo semen is in very short supply so the window is closing to attain Kargo genetics.

Predictability and consistency are what we all strive to achieve. Red Blair's Power Eye 621C and Red Blair's Power Eye 612C are full sibs to the \$21,000 Red Blair's Bonita that was a class winner in Denver and Champion Red Angus Female in Rapid City. Power Eye offspring have had a great 2016 and 2017 and demand has never been higher. The Bonita 205T donor has passed away and this mating can never be created again. The time is now!

This group of Double Deuce bulls will definitely catch your attention. If you need bulls that will calve easy, throw calves that exhibit balance, shape and hair then you need to spend some time analyzing this group. These three would work really good on a group of F1 females.

- A long-sided, deep-ribbed bull
- Another power bull, his EPD's rank him in the top 4% for weaning and the top 5% for yearling weight
- His dam, 8W, is a Prowler daughter, who is a very soft made, highly efficient female with a flawless udder. We have a number of Prowler daughters and they are all great producers

Sires that Represent

THE LAZY T RANCH COMMERCIAL BRED FEMALES
These bulls have sired or are service sires to all the heifers

Heifers are due to calve May 1, 2017. Heifers exposed to Red and Black Angus bulls for 45 days.

Warman Veterinary Services has been the primary herd health veterinary practice for the Lazy T Ranch cow herd since 2011. During this time I can confirm that the herd has maintained an up-to-date vaccination protocol and there has been a continued focus on culling for performance.

With respect to the vaccination protocol, the cow herd has been re-vaccinated annually with Bovishield Gold FP5 (IBR/PI3/BVD I and II/BRSV) as well as with an Ultrachoice 8 vaccine (clostridial bacteria). Heifers have had the adequate two-administration regime prior to receiving the annual booster vaccination.

With respect to the pregnancy diagnosis and culling, all pregnancy diagnosis is performed by rectal ultrasonography. During this process, cattle are assessed based on body condition, physical soundness (feet and leg quality) and udder quality and culled accordingly.

Regards,
Curtis Read, D.V.M.

Lazy T Ranch - SCOTT GREINER - 306.536.2157
Box 549, Indian Head, Saskatchewan S0G 2K0 sjcattle@sasktel.net

170 LAZY T RANCH COMMERCIAL BRED HEIFERS SELL

Lazy T Ranch is family-owned and operated and has been in business for over 30 years. Lazy T Ranch grasses over 4000 yearlings, and calves out over 800 cows annually. We adhere to strict cattle feeding, grazing, vaccination, and nutritional schedules to produce "the best of the best".

Documentation and record keeping is an integral component to our production of above average cows & calves. Working with the Gallagher Team, we have created feed and cattle inventory databases that collect historical life data for all of our livestock on the ranch. Our calves are weighed at birth, branding, and weaning time which allows us to strictly select the highest producing replacement heifers possible. By following the life data of our calves, as well as, entries regarding the cow's udder score and condition at calving time, we turn our calves into top-producing bred heifers.

At Lazy T Ranch we believe that to produce the best calves, we not only need great cows but also great bulls. The old adage, "You need to spend money to make money" is something we hold trust in. We buy only the top-producing bull power, and our bred heifers show that. We have been supporting Blairs.Ag to build our cow herd for over 8 years, as their commitment to excellence in bulls aligns with our business structure. Our homegrown steers had gains over 2.8 lbs and our heifers had 2.4 lbs gain. Our homegrown calves have always out-produced and out-healthy any purchased cattle in regard to both grazing and finishing. The genetics we have in our homegrown cattle never miss a beat.

Lazy T Ranch follows very strict nutrition guidelines and uses custom mineral packages to create top performing outcomes. Our bred heifers are the best cattle we have seen on Lazy T Ranch, and we believe they will produce only the best. This set of bred heifers has been years in the making, with contributions of expansive time and energy into their health and genetic profile.
