On behalf of everyone at Blairs.Ag, we would like to welcome you to join us April 7th for the 2015 Pursuit of Excellence Bull Sale. We are extremely pleased with the bull offering and look forward to touring you through the pens.

There is no question that this is a great time to be in the cattle business as the market continues to be at record highs and the opportunities for the immediate future looks very positive. As we are in a herd building phase in the market, proven, consistent Angus genetics that will make great mother cows will continue to bring top dollar. These bulls are backed by exceptional cow families that will make the replacement heifers that you are looking for. This is a year that you cannot afford to have open cows. The slaughter price is high but the price deferential between an open and bred cow has never been higher! So make sure your herd bull battery is at full strength. We understand that a bull purchase is important decision on your operation and is key to your future success, so please contact any one of our team or sale staff to help you identify the right bulls for you.

We have a great team of people at Blair’s and would especially like to thank the Jackson family as all of the Blair’s and Jackson bulls have been developed at Jackson Cattle Co. from the time they were weaned and they do a fabulous job of handling and managing these bulls right up till sale time. Along with the Jacksons, we are pleased to have the Friesen family at Midnight Cattle as guest consignors. Check out their bulls on sale day, lots 65 - 74.

For our American friends, this is the year to be buying bulls in Canada as our dollar today is at $0.80 so there is a 20% discount. The current exchange rate will be announced on sale day.

Look forward to visiting with you sale day.

Sincerely,

The Blairs.Ag Team

Levi, Carmen and son Chance own and operate
Jackson Cattle Co. at Sedley Sask. We have
been involved in the purebred cattle business
for 26 years, and that passion is shared by our
son Chance. After our Red Angus dispersal
in 2006 Levi maintained a small group of Red
Angus females, and recently Chance has
started his own herd of Angus. Bulls from both
these programs are marketed in the Pursuit of
Excellence bull sale. We have been involved with
Blairs since our dispersal and currently manage
all their young cattle and sale bulls. We feel
fortunate to be involved with Blairs.Ag.

Levi, Carmen, and Chance Jackson

Midnight Fire Cattle Company is very pleased
and excited to be back at the Pursuit of
Excellence bull sale. We took a year off from the
sale to give ourselves some time to make some
very large farm decisions that have been pushed
and ignored for several years. We have added in
the second generation onto the farm and they
are very energetic in the cattle breed. The bulls
that we have supplied this year are from the top
of our herd going through a very intense cull
procedure so that only the best come to sale
Day. We have always believed in producing easy
keeping, easy fleshing, hardworking and long
lasting animals as I am sure you will see.

Herb and Donna and family,
Steven and Tami-Lynn and family

One of the best herdsire and stud bull prospects to sell this spring. This incredible Kargo son is ultra complete and is built and bred to have widespread acceptance and success in a variety of programs. His dam easily ranks as one of our top producers. Her first heifer calf was the pick of the herd choice of Wildcat Creek, KS at $18,000; her second calf, a Kargo daughter was also purchased by Wildcat Creek; a son sold to Wasem Red Angus, ND and recently, a full sib was purchased by Power+Plus, OK, in the Class of ’14 sale. If you like the picture, just wait until you see him in person! Terms to be announced.

Maternal Sister, Red Blair’s Sweet Cheeks 1Y, purchased by Wildcat Creek Ranch for $18,000 as their pick of the 2011 heifer calf crop

Full Sister, Red Blair’s Yankee 28B, purchased by Power Plus Genetics, OK, in the Class of ’14 sale

Sire, Red Ringstead Kargo 215U, senior herd sire at Blairs.Ag.

This Cash son has been one of the favorites of the Blairs.Ag crew from the moment he hit the ground. He features extra stoutness, great dimension and top performance. His dam is moderate, deep and fertile and weans heavy calves consistently. 192B has the power and pattern to make an outstanding herd sire for a serious Red Angus breeder. He’s definitely one of the most impressive Cash sons that we have ever offered.
Here’s an unique combination of tried and true Red Angus genetics. 541B’s sire, Gladiator 32L is renowned for his ideal females that have beautiful udders, plus he’s a calving ease champion. On top of all that, he is in the top 1 percent for marbling and top 6 percent on rib eye. Mix in the added power and performance of his Full Throttle dam, and you have an all around bull that can enhance your program.

This dark red calving ease prospect is as smooth and neat made as they come. His dynamic donor dam, Darline 15R, is one of the most recognized cows in the breed. Her first year of production at Blairs.Ag has been very successful. Full sibs to 555B were two feature lots in our Class of ’14 sale at the Agribition. We expect this Cutting Edge son to be very similar to his sire and make fantastic females with exceptional udder quality.
Kodiak 5R needs no introduction having sired consistent quality and top value for breeders across North America and this terrific son exemplifies that. Kodiak 532B is correct, powerful and yet has that front extension and the “Herd Bull” look that will put him at the top of your list sale day. His dam is a full ET sister to the New Generation bulls that led our 2013 bull sale going to Brett Gaube and Remington Land and Cattle. A true breeder bull here.

His dam is a full ET sister to the New Generation bulls that led our 2013 bull sale going to Brett Gaube and Remington Land and Cattle. A true breeder bull here.
Seven of the nine yearling bulls that Chance has in the sale, have Kodiak on the paternal side of the pedigree. As the saying goes “If it ain’t broke, don’t fix it.” That’s how we feel about Kodiak. This bull is a great example of that. Strong topped, good haired, easy fleshing out of an outstanding 9 year old cow, who really should be a donor cow. She has a full sib to 6B at her side this year. This bull will add pounds to your calves and dollars in your pocket.

This is a big strong bull with a ton of hair. Bushwacker’s dam, the Tibbie 179W female is one of Chance’s premier cows. The Grand dam, 813P is still in production here, and his sire Kodiak is one of the great sires in the Angus breed. Real proven genetics in this calf, all the guess work is taken care of. He will be hard to miss on sale day.

Another really good Kodiak son here. When you see these calves you will appreciated why Chance has maintained such a large influence of Kodiak in his herd, they are the right type. His Game Day mama just makes him that much better. Hair, muscle, soft made, sound, you won't go wrong using bulls like this.

This calf is a result of three embryos Chance purchased from Six Mile Angus in the fall of 2013. He put in three eggs and got three calves. The two heifer calves were in his show string this past fall. The sire Motive is a proven calving ease bull, and the dam, Beauty 803U, is the picture perfect Angus female.

A low birth weight Tiger son. Tiger is a name synonymous with great cattle in the Angus breed. He is a calving ease bull with explosive performance. Good numbers on this bull.
Another Payout son here. We are really happy with the job that Payout has done for us, he is used not only on the cow herd but have bred him to heifers with great success as well. 39b is a real complete bull out of a moderate framed, soggy, super nice angus cow. You’ll want to keep all the daughters out of this bull.

This is a big powerhouse of a bull, sired by Payout, a bull Chance bought from Ring Creek Farms. 30B ranks in the top 2% for weaning, 3% for yearling and the top 2% for milk numbers in the breed. This bull is made right, and his mama is super female, deep sided with a great udder. 30B will be a definite feature on sale day.

This bull is an absolute tank. He’s loose hided, square hipped, deep sided. It’s really hard to find a fault in this bull. His mother, a daughter of the great Pioneer bull, is the right kind, moderate framed, good uddered, soft made. She has a knockout International calf at her side this year. Everything about this bull reads right, one of the most proven, predictable pedigrees you will find, low birthweight, performance, great numbers.
We capitalized on the opportunity to purchase the pick of the Johnson Livestock heifer calves at CWA Masterpiece 2013 and our choice was Lass 2006, the dam of Final Answer 58B. This powerful SAV Eliminator daughter did a magnificent job raising this impressive bull calf. Final Answer is world renowned for producing cattle that work in all conditions. If you are trying to build a cow herd or sell valuable seedstock, this bull needs to be on your list.

If you’re seeking calving ease, fleshing ability and moderation, take a look at this top heifer bull prospect. His sire is a calving ease specialist from the Ohlde program and his exceptional New Edition first calving dam was so impressive that she went directly into our donor pen. 453A is sound made and extremely functional and deserves your consideration.
Cash 45A is a genuine herd bull that will add pounds and quality to your calfcrop. He is definitely one of the top sons of Cash that we offered to date. He is off of Larkaba 17T, a dark red, model Angus cow who has just graduated to our donor program this fall. She produced a Perfection herd bull that sold to South View Ranch in 2012 and a has an excellent daughter in our herd that produced a heifer that Baxter Blair showed successfully in 2014. This mating works and will definitely work for you!
Corner Creek Cash X Cockburn Ribeye! I don't know if you could write a Red Angus pedigree with more raw power, performance and muscle in it. Cash 31A is a true beef bull with size, scale, and dimension. Check out his video!

Another powerful Cash son out of a beautifully made cow. These Cash bulls will produce steers that weigh up in the fall and allow you to keep a beautiful set of replacement females.

Corner Creek Cash X Cockburn Ribeye! I don't know if you could write a Red Angus pedigree with more raw power, performance and muscle in it. Cash 31A is a true beef bull with size, scale, and dimension. Check out his video!

You'll like the design and shape of these Encore sons. They're good topped, level hipped, and really get out and move.

Advance is a tank. Big hipped, strong topped, with more rib, depth, and volume than most bulls. With a very acceptable birthweight, and a Straight Canadian pedigree that says performance. Advance has great scrotal development and a super disposition.

Check out Lot 19 as the mating is basically reversed and the results are the same. A super complete, stout made Red Angus bull out of an extremely nice female by Cash. The foundation of this pedigree is the National Champion, Lass 41N. The Lass Cow family is a cornerstone here at Blair’s and production like this is the reason why.
Another solid sire from the strong Lass family. His dam, Lass 63K is still working at 15 years of age and has a long list of accomplishments including producing the many times champion female, Lass 41N and numerous bulls to our commercial customers and some of her daughters in our herd. A full sib sister topped the Class of '13 sale going to Rust Mountain View Ranch, ND.

These Power Eye flush brothers are out of the Annie 192U cow that was the high seller at the 2009 Red RoundUp sale to Rust Mountain View Ranch. They are powerfully constructed and wide made. Again the Ribeye x Cash pedigree yields some real beef bulls.
If you need a set of powerhouse brothers to turn out, you better have these sibs marked in your catalog.

Dark red and good. The Annie donor works with whatever bull you mate her to. This Timberlake bull will definitely catch your eye. Check out his video. His powerful design will really catch your attention.
One of the very best bulls in the entire offering. This Replica son really puts it all together in a powerful package. His prolific dam has produced offspring selected by TJ farms, Kirk Kiesman, and Dale McKay and we’ve retained 2 more daughters in the herd. Lots of production here.

Another high caliber bull to add to your list. His sire, Gangster 31Y is one of our primary calving ease sires for heifers and has done a tremendous job. The Gangster offspring are soft-haired, moderate, easy doing type cattle that are extremely quiet and this bull fits that mold. His dam is a Red Round Up Graduate owned with Rob Saik. She is an own daughter of the famous Soo Line Countess donor owned by Wildcat Creek.
This is a mating of Faith 8L X Reload has worked over and over again. Faith 8L has produced numerous commercial herd bulls and female and is still working at 14 years of age. He is a full brother to the popular champion, Faith 74Y, pictured below.

When we were getting started our Red Angus program, we purchased a group of cows from Lucky C Ranch and what a group of cows they turned out to be. This bull has a Lucky C cow family on the top and bottom side of his pedigree with a Goldie on top and a Nissan on the bottom. If you are keeping replacements make sure this one makes your list.

Detour sons have been extremely popular throughout North America as very functional, easy calving, nice patterned cattle. A Detour son topped the Pursuit of Perfection sale last year and here's another good one. His dam was our pick in the Red Angus females in the 2013 MRL sale. He has the same breeding as their Tilt herd sire that topped their sale in 2013 and some of their best calves this year.
Here's a smooth made Redwood son out of a broody New Generation daughter. He'd be a strong heifer-bull candidate.

Another Redwood son that is nice patterned and smooth made. He's sound and gets out and moves.

The Daytona sons have been popular in the sale over the years. This bull likely be the last Daytona bulls available.

We had the opportunity to purchase a group of paternal sibs to our senior herd sire Kargo 215U and the dam of Capacity 4A is one of them. This bull will go out and get the job done for you.

Black/red carrier. With a negative birth EPD, born unassisted out of a first calf heifer 31A has proven calving ease on both sides of his pedigree. SAV Final Answer, and NBAR Hamley are two of the most proven calving ease bulls in the industry. 31A is below breed average for birth weight and above breed average for weaning, yearling and milk. Smooth made, long sided, very sound, with an excellent disposition.

This is a very sound, easy striding 2 year old bull. Both of Chance’s 2 year old’s, as well as Levi’s Black 2 year old are sired by the ABA 95X Bull, a SAV Pioneer son, so you can see the stamp he put on them. This fella should cover the cows for you.
This is an extremely attractive 95X son, that we used ourselves last year to breed our commercial heifers as well as follow behind our AI program on our Purebred heifers. We really think a lot of this bull. We have two calves on the ground right now, and will have more by sale time. An eighty pound birth weight out of a first calf heifer, lots of performance and balanced EPD'S, and one of the best footed bulls you will find anywhere. He is one you will want to see on sale day. Trich tested.

Here’s a direct son of SAV Pioneer that is smooth made and has plenty of extension. He’s out of one of our Mountain View Tibbie donors. His full sib heifer calves sold in our Genetics in Motion sale to Rehorst Ranch, ON and J & S Cattle, SK. He’s also a maternal sib to the dam of the terrific Lot 5 Kodiak yearling.
Easily one of the most impressive herd sire prospects in the sale. This New Generation son combines a lot of things that the beef industry is looking for… optimum size, tremendous dimension, structural soundness and genetic value. His dam is a cornerstone donor in the Blairs.Ag program. Full sib to Lots 47 & 48.

This full sib brother to Lots 46 and 47 has is moderate designed and has a lot of shape and volume. His dam is highly recognized as a leading producer for Blairs.Ag. A right to flush this cow for a year sold to Bandura Farms and a full sib sister was selected by Justamere Farms in the 2014 Female sale. Strong, dependable genetics here.

This New Generation bull is sound made and practical in his makeup. His dam, May 183P has sold 13 bulls through this sale including 8 full brothers that led off the 2012 sale. One of those bulls is Prism, who is the sire of lot 71 and 72 for Midnight Fire Cattle Co.

Here’s a solid New Generation son that is big bodied, easy doing and has great muscle expression. Check him out on sale day.
You’ll like the looks and power of this phenomenal Latest Version son that is one of the highlights in the black division. His very productive Net Worth dam was a high seller at the Remington dispersal. A maternal sister is now at Lewis Farms and Jessica Andrews chose a daughter as her show heifer project in our scholarship program.

Latest Version was a really impressive New Attraction son that unfortunately went down before we could really utilize him. They have a tremendous amount of balance, correctness and eye appeal. Look up this Version son on sale day.

Power and performance from Miller/Wilson genetics.
Another Final Answer bull and this guy shows it very long body with great big legs. His frame is moderate but is complete he is not tight and his walk is very even. With a wide chest floor like him he will be able to breed cows or heifers and they will bring excellent calves.

Another Final Answer bull. We use him the same reason everyone else has and that is because he creates the top of the market animals you can see his larger frame will be a nice addition into any herd and will help create the best calves you have ever had. His feet will last this guy for many years and he has a wide frame so he can breed some of the biggest cows.

Another Final Answer bull. This bull has a long body that is very well put together he is from the proven final answer and brings excellent genetics with him. He will bring bigger calves year after year.

This bull is an excellent showing of the quality of cattle we have. This guy is very easy fleshing has a extremely quiet disposition and carries himself well. Being a bull from the very popular and proven final answer bull he will add power and size to any operation.

This bull is a moderate framed bull that is a really good example of what we are trying to produce and easy calving easy fleshing bull. He will produce great calves that you will want to keep in your herd and grow from.
This Excitement bull is larger framed with an excellent calving ease he will add size into your herd creating more weight at weaning time or for rebreeding. He has very deep muscling which also helps prove how much power this bull has to offer.

Here is another moderate framed bull that has power in his footsteps he is out of our prism bull that we bought a couple years ago from this very sale and his calves have shown massive growth from calving to weaning which will definitely bring you top dollar when it comes time for weaning.

This bull is out of the Blairs New Generation that we purchased in 2012 for 10,500. We have been very happy with the quality of animals this bull brought us year after year. He would make an excellent cow bull.

This is a Spitfire progeny. Spitfire did wonderful things with our herd since we bought him from Belvin Angus in Alberta as a yearling he has brought consistency into every animal he has sired they have all been easy calving and easy muscling and this guy will do just that for you to.

Belvin Panic Switch 2’11 2A is an A.I. son out of the highly popular bull Panic Switch who sold at the Calgary bull sale for 26,000. He is a moderate framed bull who is put together well and will bring out the best in your calves for many years to come. We retained a half-brother to him for our own personal herd sire and we have been extremely pleased with the calves he has thrown us this year.
