GENETICS.... NIMOTION

OCTOBER 14 MOOSE JAN

Blairs. Ag

MOOSE JAW, SASKATCHEWAN •1 PM

Welcome to the sale...

Another year has passed and the cattle business continues to show tremendous strength. Those people that have persevered should be proud of the decisions they have made. Now is the time to expand your operation to prepare for the good times ahead.

The 2012 Genetics in Motion sale will be a first for us as we decided that it was time to try a sale without the printing and mailing of a catalogue. Technology has advanced to the point where it seems that it makes more sense to take the resources from printing and mailing a catalogue and put the money in the hands of people who earn their living in the ag industry. We will have more consultants involved in helping with the sale and we encourage those of you who are unable to attend in person to call one of the sale consultants to help with your purchases. Please help us encourage others to check out the catalogue online at www.blairscattleco.com.

We are very proud of our decision to enter the Angus breed six years ago and have spent considerable time and resources to ensure that we are a leading program in North America. We continue to search for elite donors and herd bulls and enjoy sharing our genetics with customers from across the world.

The entire Blairs.Ag Cattle Company team works hard every day to advance our program at a rate that allows us to share genetics on a yearly basis. We believe strongly in embryo transfer and thank the entire team at Davis Rairdan for their dedication to our success. We are committed to the long term improvement of the Angus breed and every day we look forward to meeting that challenge.

Please join us in Moose Jaw on October 14 for the 2012 Genetics in Motion sale.

Kevin Blair and the Blairs. Ag Cattle Co. Senetic Advancement Team.

May 183P earned a special place in our hearts last year when we lead off our bull sale with 8 two year old full brothers off 183P and Duff New Generation. There is no greater test of a female's value then her ability to produce herd bulls. Have a look at the perfect udder on May 183P and then look at her shear power, from her huge hip right through her perfectly shaped skull. May 183P is only available for sale because of the bank of embryo's we have put up on her. She comes with an incredible set of balanced EPD's and will become a leader in your program. The Elora family has a rich history at Jackson Cattle Company in Sedley. The dam Elora 201N is also a full sister to Elora 203N that Justin Morrison sold in the SooLine Cattle Co. dispersal to Wildcat Creek in Kansas. Elora 23T is a great Mulberry and is carrying the service of the great Red Corner Creek Cash 2R. Cash x Mulberry is fast becoming the most interesting mating across North America and we believe will be talked about at great length after Denver 2013. Check out the EPD's on this great female and imagine what she can do for you. Exposed to Red Corner Creek Cash 2R May 30 – Aug 20

Al'd to Dameron First Impression April 9. Pasture exposed to BUSHS Conquere April 25 - July 21 Vets opinion safe to Al.

MICH Blackcap Gal 184Y is a daughter of MCC Blackout who is rocket fronted, big bodied and has a beautiful look about her. Her dam TR MS Blackcap Gal came out of the Troy Thomas herd in South Dakota and stems back to the great SAV 8180 Traveler 004. This heifer is moderate in her make up with a very attractive, maternal look and will turn into a very productive cow in ant program. In the vets opinion she is safe to the current Denver champion Dameron First Impression which should make to be a very exciting mating.

I knew when we purchased Della 28S from the Diamond B Ranch dispersal that she had the potential to profoundly impact our program. I couldn't have imagined that in just two years she would have produced back to back great ones. The SAV Density females are fast becoming the most sought after black genetics globally. We only own two of them and the other sells today as Lot # 5. This year's heifer Della 315Z is as cool as they come. She has had that presence all summer in the pasture and if her dam was halter broke would have been our pair to show this fall. Della 315Z has more rib shape, bone and power than you could ask for in a heifer and took a killer video. We are super excited to share this OUTCROSS black/red carrier genetic package as we know she will do great things.

Tibbie 60M was a special purchase at the Mountain View Farms dispersal. We knew we needed to add depth to our black donor pen and we were extremely excited after we purchased 60M, 935S, 71L and 25N. We are excited to offer 3 heifers off the first flush off 60M x Duff New Generation 6107. If are serious about finding those females that will change a program we think these are the answer you are looking for.

MICH Annie K 51Z is a stout, hairy, big performance gal out of RC Wiley Post. This January heifer calf is extremely long sided, square hipped and has power to burn all wrapped up in a very complete package. She blends power and performance with that classic look and show appeal. MICH Annie K 51Z will make a very nice addition to any program.

Floressa 314Z is our first offspring off the much sought after JL Floressa 168T from the Remington Dispersal. A full sib sold on the same day to Lewis Farms. We paid \$15,000 for Floressa 168T and we can't wait to get her into our donor pen. 314Z is going to make a power cow and you need to give her careful consideration.

We are very proud to offer genetics off the outcross WAF Zorzal 321U herdsire. The Oakleaf 307Z heifer comes off a gorgeous cow we purchased from the Lookout Stock Farms sale last fall and we think she will have a number of friends on sale day. She is a super feminine heifer with a ton of future. Think about how she will improve your program.
